

Symmetry Surgical's **Ultra® ReVeal Anterior Cervical Fusion (ACF) Retractor System** is designed to provide an accurate and effective approach to cervical spine procedures.

Featuring more than 75 instruments, our complete system provides surgeons with the instruments required for spinal anatomy access, including:

- Side-loading locking retractor handle
- Push-button locking system
- Radiolucent retractor blades:
 - Blunt
 - Short and long tooth
 - Micro blunt and micro short
- Low-profile double-hinged longitudinal and transverse frames to conform to patient anatomies
